

## EPISODE 23: SHOW NOTES AND ACTION ITEMS

Episode 23 features a partnership between Intel and The Maricopa County Community College district to launch the first community college degree program in AI and Machine Learning. See [“Intel Launches First Artificial Intelligence Associate Degree Program.”](#)

In this interview you heard Professor Bassam Matar describe the program at Chandler Gilbert Community College; here is a link to the [video](#) that describes the program and [more details about the program](#) itself.

Intel has also published a [white paper](#) that analyzes responses from 145 people at 133 companies to learn how Industry 4.0 demands the co-evolution of workers and manufacturing operations.

Bassam mentioned an [article](#) that says, “Whoever leads in artificial intelligence in 2030 will rule the world until 2100.” Now that’s saying something! And that leads us to your action item...

Your action today is to look at your own education and training programs or those of your partners and identify opportunities to introduce AI and Machine Learning. You might decide to offer an Intro to AI class as Carlos Contreras from Intel suggested. And how about adopting a professional goal to learn more about AI? To do this you might use this free online course called the [Elements of AI](#) or start by reading [“What is AI? Everything you need to know about Artificial Intelligence.”](#)
