

## EPISODE 42: SHOW NOTES AND ACTION ITEMS

In today's interview you heard Todd talk about the need for skilled technicians, particularly those with digital and troubleshooting skills.

A great resource is the [Micro Nano Technology Education Center](#). It was founded on the idea that working together to accomplish a greater goal will enhance the quality of education for students who then become higher quality technicians for the industry. They offer a number of [professional development](#) opportunities.

The [Support Center for Microsystems Education](#) also offers a number of educational materials and resources.

In the podcast we talked about the recent [Chips for America](#) act. Your action is to [participate](#) on Thursday, September 8 and Friday, September 9, 2022, from 12PM to 3:30PM (EST), to discuss ideas surrounding semiconductor workforce development and academic infrastructure and to hear the speakers' perspectives about trends in semiconductor R&D and advanced manufacturing.
