EPISODE 46: SHOW NOTES AND ACTION ITEMS

Integrating Emerging and Cross-Cutting Technologies: Electric Vehicles with Kevin Cooper

Join Kevin and Mike as they explore the exciting realms of renewable energy and electric vehicles (EVs). From insights gleaned during a visit to Tesla’s Gigafactory to discussions on EV safety, diversity initiatives, and emerging technologies, they offer a comprehensive overview of this rapidly evolving industry.

Dive into these resources to deepen your understanding of renewable energy, electric vehicles, and related topics discussed in the podcast.
